Java

```java
class Solution {
    public int maxCount(int[] banned, int n, int maxSum) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} banned
 * @param {number} n
 * @param {number} maxSum
 * @return {number}
 */
var maxCount = function(banned, n, maxSum) {

};
```

C++

```cpp
class Solution {
public:
    int maxCount(vector<int>& banned, int n, int maxSum) {

    }
};
```
